Work experience

OSF Digital – Backend Developer

JAN 2022- JUL 2023

As a backend developer, I played a key role in maintenancing, designing and implementing solutions

- Developing custom code solutions using SFCC Commerce Cloud's APIs, including creating custom cartridges and pipelines, and integrating with third-party systems
- Implementing frontend user interface components using HTML/CSS/Js, jQuery and ensuring that the user experience was optimized for all devices
- Collaborating with quality assurance teams to ensure that all features were tested

During my time in this role, I gained understanding of the Salesforce Commerce Cloud platform and its capabilities, as well as the importance of delivering a high-quality user experience.

I also developed strong project management skills, as I was ensuring that they were delivered on time. Overall, my experience as a backend has been instrumental in helping me develop the necessary skills to be successful in the tech industry.

30Hills – Belgrade, Serbia, Internship

JUNE 2021- SEPTEMBER 2021

Backend Developer Internship

Education

Singidunum University, Belgrade, Serbia
